

Rain cover

Set includes:

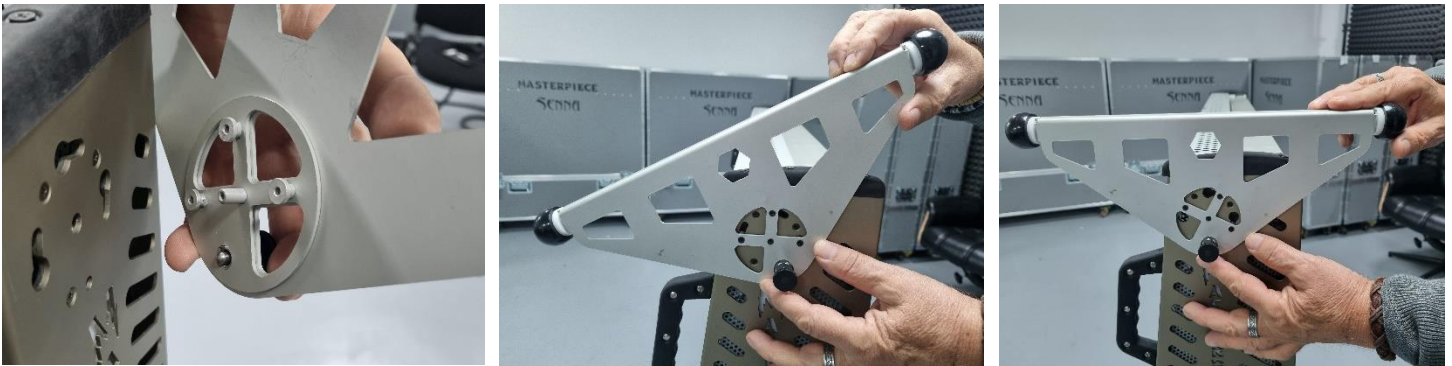

- 2 small holders
- 2 large holders
- Rain cover
- Small rain cover (for power supply)
- 3 rubber bands (1 small, 2 large)
- Carry bag

User Manuals

Mounting the rain cover

The fixture should be without the yoke.

Larger holders should be mounted on upper corners and smaller ones on the lower corners of the Masterpiece housing.

To mount the holder please follow the steps:

1. Align the holes with bolts (the holder must be rotated for 45°)
2. Lean the holder to the Masterpiece housing
3. Then rotate the holder to make it straight.

Now mount a large rubber band around the edge of front holders so that it forms a square shape.

The other large rubber band should be mounted around the edge of back holders so that it forms a U shape. (this is very important!)

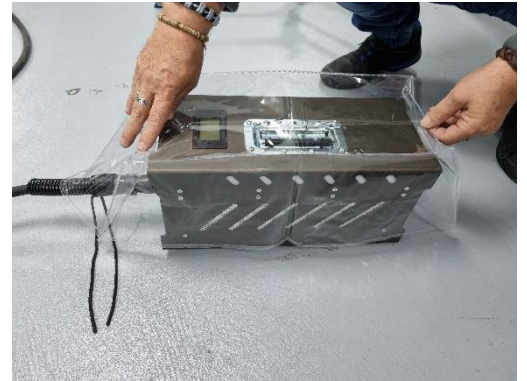

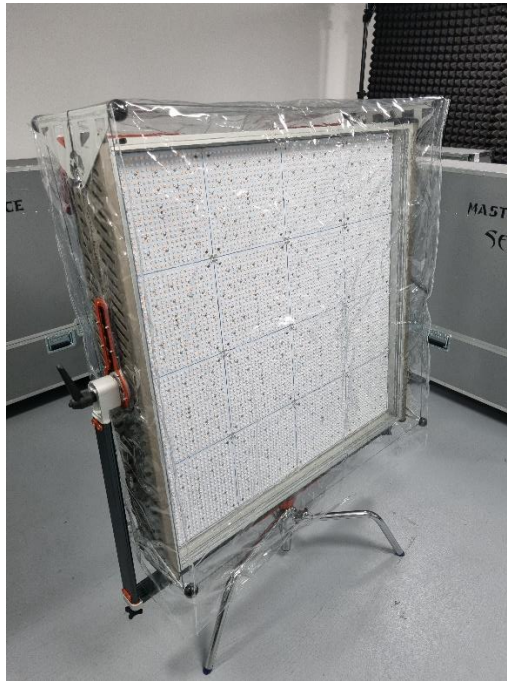

Mount the small rubber bank on top of the upper holders. Make sure the rubber band end lean tight to the aluminum.

User Manuals

Now put on the rain cover. Plug it to the connector at the back of the Masterpiece and stretch it over the handles.

Attach the yoke, and put the small rain cover over the power supply.
Your Masterpiece is ready for rainy weather!
