

## Diffuser Spacer

Set includes:

- 2 holders with slots
- 2 holders with locking system
- Flange

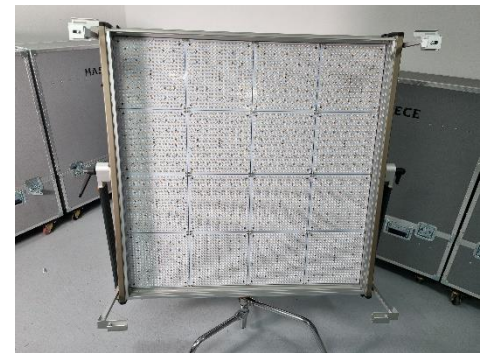

## Mounting the kit

Mount the holders on all 4 corners of the Masterpiece housing.

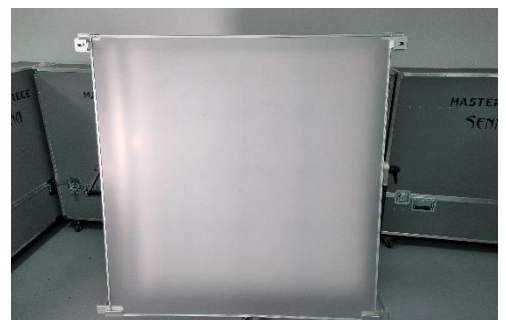

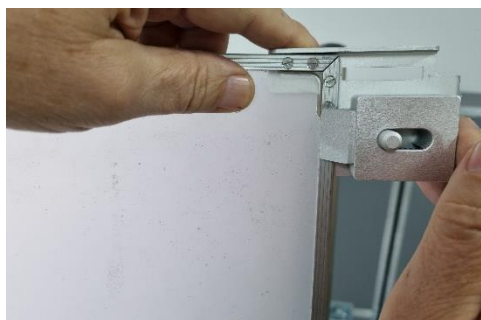

Holders with locks should be mounted on upper corners. To mount the holder please follow the steps:

1. Align the holes with bolts (the holder must be rotated for 45°)
2. Lean the holder to the Masterpiece housing
3. Then rotate the holder to make it straight.

Holders with slots should be mounted on lower corners. To mount the holders please follow the same steps as mentioned above.

When you have mounted all 4 holders, it is time to add the diffuser. Put the diffuser so that it fits in the slots and secure it with the locks.

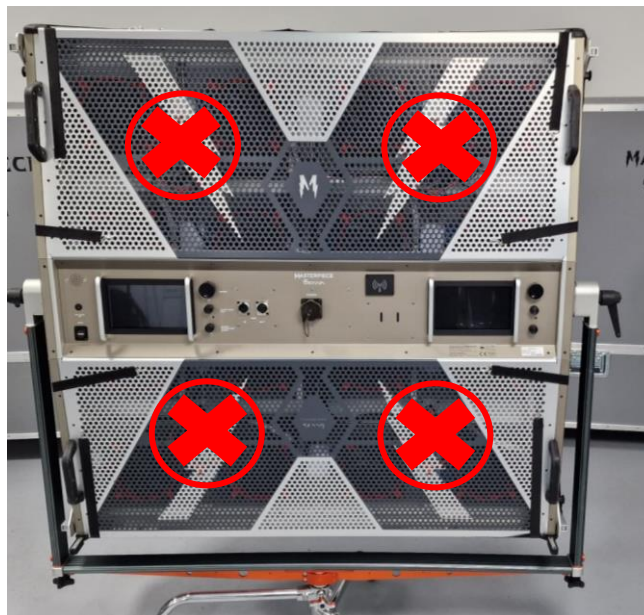

## User Manuals

Put the flange around the holders. Make sure the sign *Top Front* is in right place as shown in the picture above.

Use the strips with hooks to fasten the flange.

The strips with hooks should be attached to the light as in the picture above. **PAY ATTENTION!** Do not attach the hooks near the fans! Place of 4 fans is marked red in the picture above.
